### Environmental Policy

Schazoo Zaka Pvt. Ltd. Is a health care product manufacturing company that strives to assure the maximum protection of its personnel, immediate surroundings and the environment.

To achieve this goal, the organization has built an environment friendly facility and adopted environment friendly procedures & activities according to international & regulatory standards ensuring compliance to this policy. The organization will:

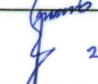

1. Incorporate environmental factors into planning all its activities, standard operating procedures and generate/retain all relevant documented information with regard to the prevention of pollution and preservation of natural resources.
2. Provide environmental management training to all its personnel & spread awareness regarding their roles & responsibilities within the Environment Management System by enhancing their knowledge about environmental issues.
3. Determine the environmental aspects of its processes, products & personnel and evaluate the potential impacts they have on the environment.
4. Periodically and regularly monitor and audit its environmental performance at a pre-defined frequency.
5. Continually enhance environmental performance, which is achieved through reducing the impacts of emissions and running a sustainable waste management program and become a part of climate change mitigation process.
6. Communicate the environment policy of the organization to its all interested parties & general public to encourage changes in social behavior of people & create a sense of awareness & responsibility towards environmental issues.
7. As a team we intend to continually improve our Environment management system by setting up 'SMART' Objectives based on this policy & periodically review their progress within a specified time frame
